

MANAGEMENT REPORT OF FUND PERFORMANCE
OAKMARK NATIXIS CLASS
(FORMERLY OAKMARK NATIXIS TAX MANAGED FUND)

For the period ended June 30, 2017

This interim management report of fund performance contains financial highlights, but does not contain either the interim financial report or annual financial statements of the investment fund. You can get a copy of the interim financial report or annual financial statements at your request, and at no cost, by calling us toll free at 1-866-378-7119, by writing to us at NGAM Canada LP (the "Manager"), 145 King Street West, Suite 1500, Toronto, ON, M5H 1J8, or by visiting our website at ngam.natixis.ca or SEDAR at www.sedar.com. Securityholders may also contact us using one of these methods to request a copy of the Fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

A NOTE ON FORWARD-LOOKING STATEMENTS

This report may contain forward-looking statements about the Fund, including its strategy, expected performance and conditions. Forward-looking statements are statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "plans", "believes", "estimates" or negative versions thereof and similar expressions. In addition, any statement that may be concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors, interest and foreign exchange rates, capital markets, business competition, technological changes, changes in government regulations, unexpected judicial or regulatory proceedings and catastrophic events.

We stress that the above-mentioned list is not exhaustive. We encourage you to consider these and other factors carefully before making any investment decisions and we urge you to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise.

Management Discussion of Fund Performance

Investment Objective and Strategies

The investment objective of the Oakmark Natixis Class (the "Fund" or the "Tax Class Fund") is to provide long term capital appreciation primarily through investment in a diversified portfolio of common stocks of U.S. companies. The Fund will generally invest in the securities of larger capitalization companies.

The Sub-Advisor, Harris Associates L.P. (the "Sub-Advisor"), uses the value investment philosophy to identify companies that it believes have discounted stock prices compared to the companies' true business value.

On December 15, 2016, changes to Canadian Federal tax rules cause exchanges or "switches" between classes within a mutual fund corporation to be treated as a taxable disposition. This change applies to switches of shares that occur on and after January 1st, 2017. Previously, investors could switch their shares between classes of the same mutual fund corporation on a tax-deferred basis, allowing them to defer accrued capital gains. All mutual fund corporations in Canada are affected by these provisions. As a result of the 2016 Federal Budget, while taxable investors who switch between series of a class of a Tax Class Fund will not trigger a disposition for tax purposes, all other switches of shares of a Tax Class Fund will be a disposition of the securities switched for proceeds of disposition equal to the fair market value thereof and taxable investors will be required to include any resulting capital gain in computing income for tax purposes.

Risk

No changes affecting the overall level of risk associated with investing in the Fund were made during the period. The risks of this Fund remain as discussed in the Fund's most recent simplified prospectus or any amendments and fund facts.

Results of Operations

The Fund's net asset value increased during the period from \$25,734,000 to \$33,535,000. This increase was a result of a combination of net sales and positive return on investments.

The Series A of the Return of Capital class of the Fund returned 3.4% compared to a 5.7% return on its benchmark, the S&P 500 (CAD) Total Return Index (the "Benchmark"), from which fees and expenses are not deducted. See the section titled "Past Performance" for a detailed summary of the performance of the Fund.

Relative to its benchmark index, the Fund's largest sector overweight in the first half of calendar year 2017 was in Financials. This overweight weighed on the Fund's overall performance versus its benchmark but was partially offset by stock selection in the sector. The Fund's second-largest overweight was in the Technology sector, which produced the Fund's largest contribution-to-overall-return. The sector also held one of the Fund's overall top-performing stocks on an absolute basis for the period, Oracle. The company's third-quarter earnings report showed continued progress in managing the transition to a more cloud-based software model. This performance was consistent with the sub-adviser's expectations, but appeared to have positively surprised others. Total revenues grew 4% in constant currency, and non-GAAP operating margins increased 110 basis points due to well-controlled expenses. Importantly, software as a service/platform as a service (SaaS/PaaS) revenues grew 86%, and margins expanded to 65% from 51% during the year-ago period as the business scaled. In addition, Oracle increased its dividend 27% to \$0.19 per quarter and repurchased \$500 million worth of stock. Oracle also delivered positive fiscal fourth quarter earnings results in June. The report was highlighted by (1) continued cloud SaaS/PaaS growth (+69% in constant currencies including NetSuite), (2) a significant moderation in the rate of decline in new software licenses, (3) steady growth in maintenance revenues (+3%), indicating the stability of the installed base and (4) non-GAAP operating margin improvement that was nearly 200 basis points ahead of consensus, reflecting increased cloud gross margins and well-controlled expenses. The sub-adviser also liked that Oracle announced a new financial reporting structure that provides greater insight into how the underlying businesses are performing. Furthermore, management issued guidance for its fiscal first quarter in excess of market expectations, adding to the sub-adviser's confidence in this investment. The Fund was also overweight in the Industrials and Consumer Discretionary sectors.

The Fund's largest underweight to its benchmark was in Health Care, which produced a drag on relative performance. The Fund's lack of exposure to the Telecom, Real Estate, Utilities and Materials sectors helped its relative performance.

In terms of absolute performance, Energy (-28%) was the only one of the seven invested sectors that produced a negative collective return. Three of the five weakest performing stocks in the Fund for the period were Energy holdings. While the Fund's slight underweight in the sector marginally aided in the Fund's relative performance, the sub-adviser's stock selection weighed on the relative return. The largest detractor both within the sector and the Fund overall was Anadarko. The sub-adviser was slightly disappointed by Anadarko's first-quarter results,

MANAGEMENT REPORT OF FUND PERFORMANCE
OAKMARK NATIXIS CLASS
(FORMERLY OAKMARK NATIXIS TAX MANAGED FUND)

For the period ended June 30, 2017

as exploration expenses were higher than expected due to a failed exploratory well in Shenandoah, and management shifted expectations for increased production growth to later in 2017 than anticipated. First-quarter results and second-quarter guidance for total sales volume were also lower than market forecasts. In addition, a number of market analysts downgraded the company when investigators determined that an uncapped gas line attached to an abandoned Anadarko well caused a home explosion in Colorado. Considering that this was a legacy, vertical well drilled by a prior operator and acquired by Anadarko in 2014, the sub-adviser views this as more bad luck than bad operations. However, this explosion prompted the company to close 3,000 vertical wells in northeastern Colorado. Anadarko subsequently became the subject of lawsuits in relation to this incident. The sub-adviser recognizes that additional regulatory analysis and legal actions will likely follow, and has adjusted some near-term metrics while they watch the situation closely.

The other six of the seven invested sectors produced positive collective returns for the Fund, led by Consumer Staples (+21%). During the first half of 2017, the Fund's sector was bolstered mainly by the sub-adviser's stock selection within the sector. The sector's three holdings—Unilever, Nestlé and Diageo—all ended the period with positive, double-digit collective returns. Health Care (+20%), Technology (+9%), Consumer Discretionary (+7%), Industrials (+6%) and Financials (+4%) also produced positive returns on an absolute basis for the period.

The Fund's top performing stocks on a contribution-to-overall-return basis for the period from January 1-June 30 were Unilever, Oracle and Apple. Its bottom performers were Anadarko, Apache and General Electric.

Recent Developments

Markets marched higher in the first quarter as economic activity continued to strengthen. The Dow Jones Industrial Average notched its sixth-consecutive quarterly gain, and the STOXX Europe 600 Index advanced for the third quarter in a row. In February, the U.S. personal consumption expenditures (PCE) index surpassed the Federal Reserve's long-term target. The eurozone's own annual rate of inflation also reached the European Central Bank's 2% target in February for the first time in four years. Citing improvements to the labor market and economic health, the Federal Reserve once again lifted interest rates in the U.S.

Overall, the sub-adviser thinks the stage is set for increased rates of economic growth in the U.S. as well as globally. Such growth should provide a boost for corporate earnings and share prices given current valuations, which the sub-adviser still finds to be relatively attractive.

As always, the short term is difficult to predict, and the sub-adviser believes an individual quarter has little influence on a business's value. Instead, the sub-adviser aims to invest in companies that they believe are trading at the largest discounts to intrinsic value. Although this often means buying stocks that might be out of favor with the market for a time, the sub-adviser accepts that long-term outperformance often comes at the expense of short-term underperformance. While the sub-adviser cannot anticipate when its perception of intrinsic value will be recognized, they will patiently wait as long as the discount exists. It is the sub-adviser's experience that this steadfast approach affords the best opportunity to provide superior returns for their clients.

The macro factors detailed above will always be given thoughtful consideration, however investment decisions for the Fund will continue to be based on the intensive, bottom-up research process that governs all Oakmark Funds. By employing these techniques, the sub-adviser seeks to identify companies trading at a discount to their estimates of intrinsic business value. The sub-adviser views market volatility favorably, and will use depressed stock prices as an opportunity to add to its positions in those sectors and/or companies that it believes are trading under value and are appropriate for the Fund.

The STOXX Europe 600 Index is derived from the STOXX Europe Total Market Index (TMI) and is a subset of the STOXX Global 1800 Index. With a fixed number of 600 components, the STOXX Europe 600 Index represents large, mid and small capitalization companies across 17 countries of the European region: Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Ireland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United Kingdom. This index is unmanaged and investors cannot invest directly in this index.

Inter-Fund Debt

Under the fund on fund investment structure, the Fund issues debt in the form of limited recourse notes to the Oakmark Natixis Class (the "Registered Fund"). These limited recourse notes are redeemable on demand by the Registered Fund, and pay interest at a floating rate equal to prime plus 1%. During the period, the maximum inter-fund debt issued was \$1,117,000 and the minimum, \$604,000. At the end of the period, the debt represented 30.5% of the Fund's net asset value. This debt is intended to increase the tax efficiency of the Fund and is not used as financial leverage.

Related Party Transactions

NGAM Canada LP (the "Manager") provides investment management, distribution and administrative services to the Fund. These services are provided in the normal course of operations and are recorded at the amount of consideration agreed to by the Manager and the Fund. National Instrument 81-107 requires the Fund, to establish an independent review committee ("IRC") to whom the Fund must refer all conflict of interest matters for review or approval. NI 81-107 also imposes obligations upon the Manager to establish written policies and procedures for dealing with conflict of interest matters, maintain records in respect of these matters, and provide assistance to the IRC in carrying out its functions.

The Manager receives from the Fund a management fee based on assets under management, calculated daily and payable monthly. NGAM Canada LP has retained Harris Associates L.P., an affiliate of the Manager, to act as a sub-advisor for the Fund. The Manager and Harris Associates L.P. are both wholly owned subsidiaries of Natixis Global Asset Management, S.A.

Management Fees

NGAM Canada LP is the manager of the Fund. In consideration for the investment advisory services provided, the Manager receives a monthly management fee based on the daily average net assets of each series of the Fund, other than Series I. From its management fees, the Manager pays the cost of portfolio manager compensation, and sales and trailing commissions to dealers who distribute securities of the Fund. In consideration for other administrative services provided, the Manager may also charge an administrative fee to the Funds.

From time to time, the Manager may reduce the effective management fee payable by some shareholders by reducing the management fee it charges to the Fund, directing the Fund to make management fee distributions to these shareholders, or by rebating these fees back to the Fund in amounts equal to the management fee reduction. Management fee

MANAGEMENT REPORT OF FUND PERFORMANCE
OAKMARK NATIXIS CLASS
(FORMERLY OAKMARK NATIXIS TAX MANAGED FUND)

For the period ended June 30, 2017

distributions are automatically reinvested in additional shares of the Fund and are accounted for as distributions for financial statement purposes.

Tax Management Contingent Fee

The publicly offered Tax Classes of each Tax Class Fund utilize a variety of value-added proprietary mechanisms designed to enhance their tax efficiency for a variety of financial planning purposes. An annual tax management contingent fee of 0.15% is charged to the Compound Growth of the applicable Tax Class Fund as the objective of the tax class, being to minimize the amount and frequency of distributions to an investor, is of unique benefit to investors of the class. The annual fee is accrued daily and paid monthly to the Manager, on the same basis as, and in addition to, the management fee. No tax management contingent fee is payable in respect of the remaining Tax Classes.

This fee will be refunded to the Compound Growth class of a Tax Class Fund if the following conditions are not met:

- a) the Compound Growth class has a positive return for the year; and
- b) the class does not pay a taxable distribution of any kind in the calendar year unless its return is in excess of 10% in that year. Furthermore, if the investment return exceeds 10% in the calendar year at least 50% of the return must remain undistributed to shareholders of the Class.

Fund Operating Expenses

Each Fund is responsible for the payment of all operating expenses including, but not limited to, taxes, accounting fees, legal fees, audit fees, trustee fees, IRC fees, custodial fees, administrative costs, investor servicing costs, broker commissions, interest and bank charges, and costs of reports and prospectuses. In consideration for other administrative services provided, the Manager may also charge an administrative fee to the Funds. The Manager allocates to the Fund certain overhead costs which are directly related to the operation of the Fund (excluding marketing and sales). Those overhead costs would include a portion of the Manager's IT computer software, systems and staff salaries, facilities, insurance (property and liability only), depreciation on fixed assets, data and telephone, printing, office and other general administrative costs.

Operating expenses are attributed to a Fund, or a Fund's series. Common operating expenses of the Funds may be allocated among each fund based on the average number of securityholders or the average daily net assets value of that fund, or other methods of allocation that the Manager deems appropriate, depending on the type of operating expenses being allocated.

Expenses Absorbed

The Manager may waive or absorb a portion of the management fees or operating expenses for certain funds. The decision to absorb these expenses is reviewed periodically and determined at the discretion of the Manager, without notice to shareholders.

The related party fees charged are as follows:

	June 30, 2017	June 30, 2016
Management fees	120,716	21,439
Tax Management Contingent fees	8,124	518
Inter-fund debt interest	17,552	5,485
Administrative services provided by the Manager	14,119	15,649
Fund expenses absorbed by the Manager	(82,125)	(70,422)

Management Fees and Class/Series Description

The Fund offers these tax classes: Return of Capital; Dividend; Compound Growth; and a single non-publicly offered Inter-Fund. Each of these classes, excluding the Inter-Fund have four publicly offered series of shares: Series A, Series F, Series H and Series I.

Management fees differ among the Fund's series of shares. The Fund pays the Manager an aggregate management fee. Management fees for Series I shares are negotiated and paid directly by the investor, not by the Fund. From its management fees, the Manager pays the costs of portfolio manager compensation, and sales and trailing commissions to dealers who distribute securities of the Fund.

In addition to a management fee, each series of the Compound Growth Class is charged an annual tax management contingent fee of 0.15% which is repayable if certain conditions are not met.

As a Percentage of Management Fees^

Financial Highlights

[†] Financial highlight information is derived from financial statements prepared in compliance with International Financial Reporting Standards ("IFRS"). As at June 30, 2017 there was no significant difference between "Net Assets" and "Net Asset Value" under IFRS.

Net Assets Per Share footnotes

- ¹ This information is derived from the Fund's audited annual financial statements as at December 31 of the years shown and the interim statements as at June 30, 2017.
- ² Net assets and distributions are based on the actual amount of shares at the relevant time. The increase (decrease) from operations is based on the weighted average number of shares outstanding over the financial period.
- ³ Distributions were reinvested in additional shares of the Fund, unless the investor requested payment in cash.
- ^{*} This is not a reconciliation of the beginning and ending net assets per share as the increase (decrease) from operations data is based on the weighted average number of shares during the period rather than actual share amounts at the relevant time.

Ratios and Supplemental Data footnotes

- ¹ The information is provided as at June 30, 2017 and December 31 of the years shown.
- ² The management expense ratio (MER) is calculated in accordance with National Instrument 81-106 and is based on total expenses (excluding distributions, commissions, portfolio transaction costs and forward fees as applicable) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. In a period where a series is established, the management fee ratio is annualized from the date of inception to the end of the period.

The Manager may authorize a reduction in the management fees and/or operating expense rates generally for certain investors of the Fund who pay or incur distribution or other expenses normally paid by the Fund or the Manager. In this case, if the Manager reduces or rebates a portion of the management fee, the Fund or the Manager pays an amount equal to the reduction either as a distribution or as a direct rebate. The MER does not take this type of reduction into account.

The Manager may temporarily reduce or absorb all or any portion of the management fee and/or operating expenses of the Fund and can terminate the reduction or absorption at any time. The Manager expects to continue to absorb these fees or expenses until such time as the Fund is of sufficient size to reasonably absorb all fees and expenses.
- ³ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average Transactional NAV during the period.
- ⁴ The Fund's portfolio turnover rate indicates how the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher the Fund's portfolio turnover rate in the period, the greater the trading costs payable by the Fund and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of a fund.
