

*This interim management report of fund performance contains financial highlights, but does not contain either the interim financial report or annual financial statements of the investment fund. You can get a copy of the interim financial report or annual financial statements at your request, and at no cost, by calling us toll free at 1-866-378-7119, by writing to us at NGAM Canada LP (the "Manager"), 145 King Street West, Suite 1500, Toronto, ON., M5H 1J8, or by visiting our website at [ngam.natixis.com](http://ngam.natixis.com) or SEDAR at [www.sedar.com](http://www.sedar.com). Securityholders may also contact us using one of these methods to request a copy of the Fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.*

#### **A NOTE ON FORWARD-LOOKING STATEMENTS**

*This report may contain forward-looking statements about the Fund, including its strategy, expected performance and conditions. Forward-looking statements are statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "plans", "believes", "estimates" or negative versions thereof and similar expressions. In addition, any statement that may be concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors.*

*Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors, interest and foreign exchange rates, capital markets, business competition, technological changes, changes in government regulations, unexpected judicial or regulatory proceedings and catastrophic events.*

*We stress that the above-mentioned list is not exhaustive. We encourage you to consider these and other factors carefully before making any investment decisions and we urge you to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise.*

## **Management Discussion of Fund Performance**

The NexGen Canadian Bond Tax Managed Fund (the "Fund" or the "Tax Managed Fund") seeks to achieve the investment objective through the investment of substantially all of its portfolio assets in units of NexGen Canadian Bond Fund (the "Fixed Income Fund"). Accordingly, the Management Discussion of Fund Performance that follows, for the period ended June 30, 2016, represents generally that of the Fixed Income Fund with the exception of the sections titled Investment Objectives and Strategies, Risk, Financial Highlights, Management Fees and Series Description and Past Performance which are specific to the Fund. Within the section titled Results of Operations, the net asset value and performance figures discussed also relate specifically to the Fund. For information specific to the Fixed Income Fund please refer to the Management Report of Fund Performance of the Fixed Income Fund. For all other periods the information is specific to the Fund.

### **Investment Objective and Strategies**

The investment objective of the NexGen Canadian Bond Tax Managed Fund (the "Fund" or the "Tax Managed Fund") is to pursue a steady flow of income while preserving capital primarily through investment in Canadian fixed income securities. The portfolio sub-advisor, J. Zechner Associates Inc. ("Zechner" or the "Sub-Advisor"), in managing the Fund, uses investment strategies analyzing the expected direction of interest rates, the relative value between various terms to maturity, individual issues and different bond market sectors.

### **Results of Operations**

The Fund's net asset value decreased during the period from \$216,569,830 to \$213,163,000. This decrease was the result of net redemptions offset by positive return on investments.

The Regular Series of the Capital Gains Class of the Fund returned 3.2% compared to a 4.1% return on its benchmark, the FTSE TMX Canada Universe Bond Index (the "Benchmark"), from which fees and expenses are not deducted. See the section titled "Past Performance" for a detailed summary of the performance of the Fund.

Bonds were well bid to start 2016 as investors tried to shed risky assets of any sort, with global equity markets and commodities experiencing very sharp selloffs. One of the worst price declines was for oil, which plunged 29% by mid-February. Other commodities were also affected with copper, for example, dropping 9%. Equity markets too were quite weak, with some having the worst start to a calendar year on record. The Chinese Shanghai index fell more than 22%, the S&P 500 and Morgan Stanley World indices both fell over 10%, while Canada's S&P/TSX was down 9%. Such large losses prompted a flight-to-safety bid for bonds that pushed some federal government bond yields to record lows. However, the risk-off sentiment also impacted corporate bonds as risk premiums (i.e. yield spreads) widened dramatically. Even provincial yield spreads widened in the panic-like conditions of the first six weeks of the year.

Bond yields also came under downward pressure from increased monetary stimulus by a number of central banks around the globe. In January, the Bank of Japan adopted negative interest rates in an effort to stimulate that economy. In February, Sweden's central bank, the Riksbank, surprised observers by lowering its administered interest rates further into negative territory, moving from -0.35% to -0.50%. In spite of the Swedish economy growing at an enviable pace of almost 4% in the most recent quarter, the Riksbank was concerned that Swedish inflation was too low. And in March, the European Central Bank cut all of its administered interest rates, increased the size of its monthly bond purchases from €60 billion to €80 billion and expanded the eligible bonds to include corporate issues for the first time.

From mid-February to through April there was a recovery that was every bit as powerful as the selloff that began the year. As a result, Canadian bond yields hit their highest levels so far this year in late April. Mother Nature intervened in early May, though, as wildfires in the Fort McMurray region forced the evacuation of more than 80,000 residents and the reduction of more than a million barrels a day of oil production. The temporary negative impact of the wildfires, combined with disappointing first quarter Canadian growth, caused bond yields to fall back in May. The biggest changes in bond yields, however, came in June when global financial markets were fixated on the British referendum to remain in or to exit from the European Union. Fluctuating opinion polls first pushed yields lower, then higher ahead of the vote. In the end, the Brexit win caused a significant drop in yields as the resultant uncertainty led to yet another flight-to-safety bid for bonds globally. As more and more sovereign bonds around the globe moved to negative yields, the Canadian bond market looked attractive in comparison. Corporate and provincial yield spreads reversed their earlier widening moves in the rebound.

The Bank of Canada left its trend-setting interest rates unchanged during the first six months of 2016. The Bank indicated that it was waiting for details of the promised fiscal stimulus package from the new federal government before deciding on the need for additional monetary stimulus. As well, it appeared that the Bank did not want to cause further declines in the exchange rate. The federal budget did deliver the expected fiscal stimulus which should increase Canadian growth later in 2016 and in 2017. For bond investors, one of the key aspects of the budget was that federal bond issuance is expected to surge higher in the 2016-17 fiscal year.

Fund performance prior to expenses was slightly less than the benchmark in the first half of 2016. The shortfall was due primarily to the over-weight allocation of corporate bonds which lagged the results of government bonds. During the quarter, the sub-advisor sold a number of corporate holdings, most often because of deteriorating creditworthiness. Sales included Metro Inc., Cominar REIT, Hospital Infrastructure Partners and Daimler Canada Finance. New holdings included OMERS Realty, CT REIT, a Manulife Bank floating rate note, TransCanada Pipelines, Bank of Montreal and Altalink. The allocation to corporate bonds increased from 44.0% at the start of the year to 46.4% at mid-year.

### **Recent Developments**

The sub-advisor believes that the volatility and uncertainty due to Brexit may last for a few months. Firstly, the British Conservative party must select a new leader as the current Prime Minister, David Cameron, has resigned and will not deal with the European Union departure. Secondly, once a new Prime Minister is in power, it is not clear whether Parliament will have to approve the decision to trigger Article 50 which governs the exit process. As the referendum was, in fact, non-binding, Parliament might choose to not approve a departure from the E.U. The likelihood of rejecting the referendum results will rise if the economic consequences appear too dire, if the British pound plummets too far, or if Scotland appears likely to hold a second referendum to secede from the United Kingdom. A third consideration is that the "Exit" side never presented a cohesive strategy for how to deal with the various dislocations that would result from leaving the E.U. Greater focus on trying to develop such a strategy may lead to caution about actually initiating the departure.

Economic growth in Canada, the United States, and globally is expected to be positive in the second half of the year. However, bond markets are not currently focussed on economic conditions. Instead, political developments and continued quantitative easing programmes by some central banks are dominating bond markets. Notwithstanding that many bond yields are at all-time record lows, it is possible that these factors will push yields even lower. Accordingly, the sub-advisor thinks it is prudent to keep portfolio durations close to their respective benchmarks.

While the Bank of Canada is unlikely to raise interest rates for the foreseeable future, it is also unlikely to cut rates. As a result, with 5-year Canada yields very close to 1-year yields, the sub-advisor is minimizing holdings of 2 to 5-year bonds. Instead, the fund is holding a combination of longer term issues and cash equivalents. Corporate yield spreads are at historically attractive levels, so the fund over-weighted in that sector. However, the sub-advisor is being cautious about issuers that may be negatively affected by ultra-low yields, such as large pension fund sponsors and life insurance companies. The sub-advisor is also cautious regarding the competitive state of retailing in Canada.

### **Change of Securities Offerings**

Effective June 15, 2016, the securities of the Ultra High Net Worth series is no longer available for purchase, except by investors who own securities of such series as at June 15, 2016, who are permitted to switch their securities of this series from one NexGen Fund or Natixis Fund for securities of the same series of another NexGen Fund or Natixis Fund.

### **Distributions**

Effective July 1, 2015, the Return of Capital Class of the Fund decreased its distribution rate from \$0.75 to \$0.48, annually, paid monthly.

### **Related Party Transactions**

NGAM Canada LP (the "Manager") provides investment management, distribution and administrative services to the Fund. These services are provided in the normal course of operations and are recorded at the amount of consideration agreed to by the Manager and the Fund. National Instrument 81-107 requires the Fund, to establish an independent review committee ("IRC") to whom the Fund must refer all conflict of interest matters for review or approval. NI 81-107 also imposes obligations upon the Manager to establish written policies and procedures for dealing with conflict of interest matters, maintain records in respect of these matters, and provide assistance to the IRC in carrying out its functions.

### **Management Fees**

NGAM Canada LP is the manager of the Fund. In consideration for the investment advisory services provided, the Manager receives a monthly management fee based on the daily average net assets of each series of the Fund, other than the Institutional series. From its management fees, the Manager pays the cost of portfolio manager compensation, and sales and trailing commissions to dealers who distribute securities of the Fund. In consideration for other administrative services provided, the Manager may also charge an administrative fee to the Funds.

From time to time, the Manager may reduce the effective management fee payable by some shareholders by reducing the management fee it charges to the Fund, directing the Fund to make management fee distributions to these shareholders, or by rebating these fees back to the Fund in amounts equal to the management fee reduction. Management fee distributions are automatically reinvested in additional shares of the Fund and are accounted for as distributions for financial statement purposes.

### **Tax Management Contingent Fee**

The publicly offered Tax Classes of each Tax Managed Fund (except NexGen Canadian Cash Tax Managed Fund) utilize a variety of value-added proprietary mechanisms designed to enhance their tax efficiency for a variety of financial planning purposes. An annual tax management contingent fee of 0.15% is charged to the Compound Growth Tax Class of the applicable Tax Managed Fund as the objective of the tax class, being to minimize the amount and frequency of distributions to an investor, is of unique benefit to investors of the class. The annual fee is accrued daily and paid monthly to the Manager, on the same basis as, and in addition to, the management fee. No tax management contingent fee is payable in respect of the remaining Tax Classes.

This fee will be refunded to the Compound Growth Tax Class of a Tax Managed Fund if the following conditions are not met:

- a) the Compound Growth Tax Class has a positive return for the year; and
- b) the Class does not pay a taxable distribution of any kind in the calendar year unless its return is in excess of 10% in that year. Furthermore, if the investment return exceeds 10% in the calendar year at least 50% of the return must remain undistributed to shareholders of the Class.

### **Fund Operating Expenses**

Each Fund is responsible for the payment of all operating expenses including, but not limited to, taxes, accounting fees, legal fees, audit fees, trustee fees, IRC fees, custodial fees, administrative costs, investor servicing costs, broker commissions, interest and bank charges, and costs of reports and prospectuses. In consideration for other administrative services provided, the Manager may also charge an administrative fee to the Funds. The Manager allocates to the Fund certain overhead costs which are directly related to the operation of the Fund (excluding marketing and sales). Those overhead costs would include a portion of the Manager's IT computer software, systems and staff salaries, facilities, insurance (property and liability only), depreciation on fixed assets, data and telephone, printing, office and other general administrative costs.

Operating expenses are attributed to a Fund, or a Fund's series. Common operating expenses of the Funds may be allocated among each fund based on the average number of securityholders or the average daily net assets value of that fund, or other methods of allocation that the Manager deems appropriate, depending on the type of operating expenses being allocated.

*Expenses Absorbed*

The Manager may waive or absorb a portion of the management fees or operating expenses for certain funds. The decision to absorb these expenses is reviewed periodically and determined at the discretion of the Manager, without notice to shareholders.

The related party fees charged are as follows:

	June 30, 2016	June 30, 2015
Management fees	1,194,265	1,401,401
Tax Management Contingent fees	111,192	126,074
Administrative services provided by the Manager	47,569	114,598
Fund expenses absorbed by the Manager	(4,810)	(4,686)

**Other Information**

***Change of Control of the Manager***

In August 2015, the name of the parent company of the Manager changed to Natixis Global Asset Management Canada Corp from NexGen Financial Corporation.

***Securities Lending***

Certain Funds may enter into securities lending transactions. These transactions permit the Fund to earn fees in exchange for an agreement to lend securities to a third party which are returnable to the Fund on demand in exchange for prescribed collateral. The value of non-cash securities held as collateral must be at least 102% of the fair value of the securities loaned. Income is earned from these transactions in the form of fees paid by the counterparty. Income earned from these transactions is included in the Statement of Comprehensive Income of the Fund's financial statements.

## Management Fees and Class/Series Description

The Fund offers six tax classes: Capital Gains Class; Return of Capital Class; Dividend Tax Credit Class; the Compound Growth Class; and the Return of Capital 40 and the Dividend Tax Credit 40 Classes (commencing March 8, 2010). Each of these classes have eight series: Regular, Regular F, High Net Worth, High Net Worth F, Ultra High Net Worth, Institutional, Deferred Load and the Low Load (commencing March 8, 2010) Series. (After June 15, 2016, the Ultra High Net Worth series is no longer available for purchase, except upon a reinvestment of a distribution or a switch from Ultra High Net Worth Series of another Fund).

Management fees differ among the Fund's series of shares. The Fund pays the Manager an aggregate management fee. Management fees for the Institutional Series shares are negotiated and paid directly by the investor, not by the Fund. From its management fees, the Manager pays the costs of portfolio manager compensation, and sales and trailing commissions to dealers who distribute securities of the Fund.

In addition to a management fee, each series of the Compound Growth Class is charged an annual tax management contingent fee of 0.15% which is repayable if certain conditions are not met.

### As a Percentage of Management Fees

Series	Management Fee* (%)	Dealer Compensation (%)	General Administration, Investment Advice and Profit (%)
Regular, Deferred and Low Load	1.35	29	71
Regular F	0.85	0	100
High Net Worth	1.00	45	55
High Net Worth F	0.60	0	100
Ultra High Net Worth	0.95	34	66

\* Applicable to all classes of shares.

## Summary of Investment Portfolio at June 30, 2016

The Fund invests directly in the underlying bond fund. The top 25 largest holdings by percentage of net asset value and sector allocation of this fund are listed below. The prospectus and other information about the Tax Managed Fund is available at [ngam.natixis.com](http://ngam.natixis.com) or [www.sedar.com](http://www.sedar.com).

The Summary of Investment Portfolio may change due to ongoing portfolio transactions of the Fund. You may obtain monthly updates to the Fund's holdings free of charge by calling us toll free at 1-866-378-7119 or by writing us at NGAM Canada LP, 145 King Street West, Suite 1500, Toronto, ON, M5H 1J8 or by visiting our website at [ngam.natixis.com](http://ngam.natixis.com) or SEDAR at [www.sedar.com](http://www.sedar.com).

## Past Performance

The past performance shows historical performance of each class and series of shares of the Fund. This information is provided to show the past performance only and does not necessarily indicate how the Fund will perform in the future. The past performance information assumes that all distributions were reinvested in additional shares of the same class and series of the Fund. The past performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance.

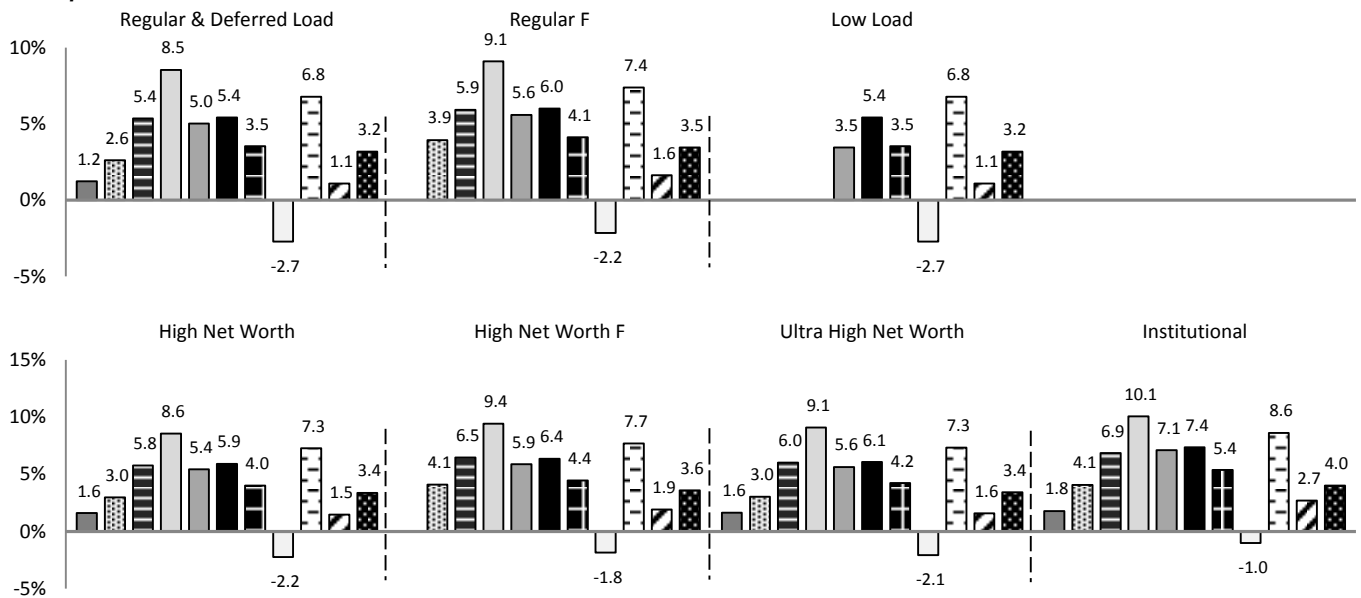

### Year-by-Year Returns

The following charts illustrate the annual performance of each class and series of shares of the Fund since the retail inception date - September 5, 2006. The charts show, in percentage terms, how much an investment made on the first day of each financial period would have increased or decreased by the last day of each financial period. (Performance for the Regular F Series and the High Net Worth F Series for 2007 covers the period from July 1 to December 31, 2007. Performance for the Low Load Series, the Return of Capital 40 Class, and the Dividend Tax Credit 40 Class for 2010 covers the period from March 8 to December 31, 2010).

## Financial Highlights

\* For financial periods beginning on or after January 1, 2014, financial highlight information is derived from financial statements prepared in compliance with International Financial Reporting Standards ("IFRS"). For the comparative 2013 financial period, beginning and ending Net Assets per share have been changed to reflect the adoption of IFRS, and for financial periods preceding January 1, 2013, financial highlight information is derived from financial statements prepared in accordance with Canadian generally accepted accounting principles ("GAAP"). Net Assets per share, for the periods prior to January 1, 2013, are calculated in accordance with GAAP, and Net Asset Value in the Ratios and Supplemental Data table is presented based on that used for transactional purposes. All other calculations for the purposes of this MRFP are made using Net Asset Value. As at June 30, 2016 there was no significant difference between "Net Assets" and "Net Asset Value" under IFRS.

## Net Assets Per Share footnotes

- <sup>1</sup> This information is derived from the Fund's audited annual financial statements as at December 31 of the years shown and the interim statements as at June 30, 2016. The net assets per share presented in the financial statements prior to January 1, 2013 may differ from the net asset value calculated for fund pricing purposes as a result of adopting the requirements under Section 3855 of the CICA Handbook, Financial Instruments – Recognition and Measurement.
  - <sup>2</sup> Net assets and distributions are based on the actual amount of shares at the relevant time. The increase (decrease) from operations is based on the weighted average number of shares outstanding over the financial period.
  - <sup>3</sup> Distributions were reinvested in additional shares of the Fund, unless the investor requested payment in cash.
- \* This is not a reconciliation of the beginning and ending net assets per share as the increase (decrease) from operations data is based on the weighted average number of shares during the period rather than actual share amounts at the relevant time.

## Ratios and Supplemental Data footnotes

- <sup>1</sup> The information is provided as at June 30, 2016 and December 31 of the years shown.
- <sup>2</sup> Total Net Asset Value and Net Asset Value per share for periods preceding January 1, 2013 are presented based on transactional NAV which may differ from amounts in the financial statements as a result of adopting the requirements under Section 3855 of the CICA Handbook, Financial Instruments – Recognition and Measurement.
- <sup>3</sup> The management expense ratio (MER) is calculated in accordance with National Instrument 81-106 and is based on total expenses (excluding distributions, commissions, portfolio transaction costs and forward fees as applicable) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. In a period where a series is established, the management fee ratio is annualized from the date of inception to the end of the period.  
  
The Manager may authorize a reduction in the management fees and/or operating expense rates generally for certain investors of the Fund who pay or incur distribution or other expenses normally paid by the Fund or the Manager. In this case, if the Manager reduces or rebates a portion of the management fee, the Fund or the Manager pays an amount equal to the reduction either as a distribution or as a direct rebate. The MER does not take this type of reduction into account.  
  
The Manager may temporarily reduce or absorb all or any portion of the management fee and/or operating expenses of the Fund and can terminate the reduction or absorption at any time. The Manager expects to continue to absorb these fees or expenses until such time as the Fund is of sufficient size to reasonably absorb all fees and expenses.
- <sup>4</sup> The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average Transactional NAV during the period.
- <sup>5</sup> The Fund's portfolio turnover rate indicates how the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher the Fund's portfolio turnover rate in the period, the greater the trading costs payable by the Fund and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of a fund.
