

*This interim management report of fund performance contains financial highlights, but does not contain either the interim financial report or annual financial statements of the investment fund. You can get a copy of the interim financial report or annual financial statements at your request, and at no cost, by calling us toll free at 1-866-378-7119, by writing to us at NGAM Canada LP (the "Manager"), 145 King Street West, Suite 1500, Toronto, ON., M5H 1J8, or by visiting our website at ngam.natixis.com or SEDAR at www.sedar.com. Securityholders may also contact us using one of these methods to request a copy of the Fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.*

#### **A NOTE ON FORWARD-LOOKING STATEMENTS**

*This report may contain forward-looking statements about the Fund, including its strategy, expected performance and conditions. Forward-looking statements are statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "plans", "believes", "estimates" or negative versions thereof and similar expressions. In addition, any statement that may be concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors.*

*Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors, interest and foreign exchange rates, capital markets, business competition, technological changes, changes in government regulations, unexpected judicial or regulatory proceedings and catastrophic events.*

*We stress that the above-mentioned list is not exhaustive. We encourage you to consider these and other factors carefully before making any investment decisions and we urge you to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise.*

## **Management Discussion of Fund Performance**

The NexGen Intrinsic Growth Registered Fund (the "Fund") invests directly in shares and debt of the NexGen Intrinsic Growth Tax Managed Fund (the "Tax Managed Fund") having a similar investment objective. Accordingly, the Management Discussion of Fund Performance that follows represents generally that of the Tax Managed Fund with the exception of the sections titled Investment Objectives and Strategies, Risk, Financial Highlights, Management Fees and Series Description and Past Performance which are specific to the Fund. Within the section titled Results of Operations, the net asset value and performance figures discussed also relate specifically to the Fund. For information specific to the Tax Managed Fund please refer to the Management Report of Fund Performance of the Tax Managed Fund.

### **Investment Objective and Strategies**

The investment objective of the Fund is to provide long term capital growth primarily through investment in a diversified portfolio of Canadian and U.S. equity securities. The Fund will seek to achieve the investment objective through the investment of substantially all of its portfolio assets in the non-publicly offered debt and shares of the Inter-Fund Class of the Tax Managed Fund.

The sub-advisor of the Tax Managed Fund, Galibier Capital Management Ltd. ("Galibier" or the "Sub-Advisor") follows a valuation driven, bottom-up investment process. Galibier seeks underpriced securities by using fundamental research to determine a security's underlying intrinsic value. Securities offering a discounted market price to intrinsic value are considered for the Tax Managed Fund. To be included in the Tax Managed Fund, a stock must pass Galibier's rigorous research and valuation process, which calculates the intrinsic value for each stock incorporating projections of 3 to 5 year future earnings, cash flow and balance sheet structure. The benchmark weighting between Canadian and U.S. Holdings in the Tax Managed Fund's portfolio will be 75% Canadian / 25% U.S. However, depending upon Galibier's assessment of the markets, the U.S. weighting may fluctuate from 0 – 50% and the Canadian weighting from 50 – 100%.

### **Results of Operations**

The Fund's net asset value decreased during the period from \$1,416,755 to \$891,000. This decrease was the result of net redemptions offset by positive return on investments.

The Regular Series of the Fund returned 1.9% compared to a 6.7% return on its benchmark, a 75%/25% blend of the S&P/TSX Composite Total Return Index and the S&P 500 (CAD) Total Return Index (the "Benchmark"), from which fees and expenses are not deducted. See the section titled "Past Performance" for a detailed summary of the performance of the Fund.

"Volatility is the friend of the long term investor" - Warren Buffett

And "volatile" sums up the performance of the markets in H1 2016. Changing expectations for the direction of future interest rate movements were a major source of the markets' gyrations as were commodity prices and continued sluggishness of general economic conditions.

Galibier welcomes short-term volatility. Why? Because Galibier's focus is on the long term when deriving its view of individual company valuations. Thus, when a volatile market gives Galibier stock prices that are well below its view of intrinsic value, Galibier buys. And when the market gives Galibier stock prices well above intrinsic value, Galibier sells and redeploys the capital into names with more upside potential.

Adhering to its philosophy of owning companies with enduring competitive advantages and solid long-term growth rates means Galibier generally does not have a lot of exposure to the volatile cyclical industries such as Energy and Materials, which happened to be strong through the first half of the year. In fact, as prices increased during the year, Galibier reduced its exposure to energy and eliminated its one gold position.

In addition, the Brexit surprise, coupled with diminished likelihood of interest rate increases, affected Galibier's interest sensitive financial names and its healthcare names were hurt by political jawboning about price controls on pharmaceuticals.

Several changes were made to the portfolio during the first half of 2016. Galibier added 8 new positions and exited 12 existing names from the portfolio.

The new names added to the fund were Alliance Data Systems, Badger Daylighting, Biogen Inc., DH Corporation, DHX Media, Enghouse Systems, Gluskin Scheff + Associates and Starbucks.

### **ALLIANCE DATA SYSTEMS**

Alliance Data Systems (ADS) is a unique company, offering their clients an ability to get closer to their customers, understand customer behavior and more effectively market to their customers. ADS has three different businesses. First is the loyalty business out of which they operate the Air Miles business in Canada. Air Miles partners with retailers like Metro,

Rexall and Toys R Us, both to analyze their customer transactions and implement marketing programs to drive transactions and loyalty. Second, ADS offers Epsilon which is a marketing and communications agency, again working with clients to drive transactions and loyalty. Finally, ADS offers private credit cards to small and medium sized retailers, which act as both a payment and loyalty tool, again allowing clients to get closer to their end customers. Galibier believes ADS offers an interesting mix of services to their clients which will become ever more valuable as companies look to deepen and expand relationships with their customers.

#### **BADGER DAYLIGHTING**

Galibier initiated a position in the shares of Badger Daylighting. Galibier has followed Badger for years but the valuation in Q2 2016 finally presented a price at which they were comfortable buying shares. Badger is the largest player in the "daylighting" market, which is a safer and more efficient way for construction companies to dig holes in the ground. While there has been weakness in its energy business, Badger's trucks have been relocated to new markets where the focus is on infrastructure investment. Galibier is very excited about the long-term growth prospects for Badger as "daylighting" becomes a more widely used technology and as it capitalizes on its North American network of offices and trucks.

#### **BIOGEN INC.**

Biogen Inc. is a biotech company specializing in the manufacture of drugs designed to treat neurological, autoimmune and rare diseases. Biogen products are also known as biologics - a complex synthesis of acids, sugars, proteins and the like that includes cells and tissues. Biologics are more difficult to manufacture and copy unlike their "small molecule" pharmaceutical peers, which are chemically synthesized and its structure easily known. In particular, Biogen has a leading position in the treatment of multiple sclerosis (MS) with products such as Tecfidera, Tysabri and Avonex - one of the first prescribed therapies for MS. Over and beyond this strong franchise, Biogen has a pipeline of products that are expected to supplement current revenues, most notably in brain diseases such as Alzheimer's and Parkinson's. Management has been in this business for over a decade with solid results. The current re-rating within the biotechnology sector allowed Galibier to establish a position in this relatively cheap name.

#### **DH CORPORATION**

DH has transformed itself over the past decade from a sleepy cheque printing business to a global financial technologies software and services business. After a series of acquisitions, management has gained expertise in core banking systems as well as a global payments platform, which enables real time settlement of global financial transactions. Clients now include some of the world's largest banks. With mission critical software and services, revenue is sticky and predictable. Galibier took advantage of what it determined was a depressed share price resulting from a "short sellers report" issued on the company in Q4 2015 and established a position in DH when it was trading at a meaningful discount to its peer group and Galibier's estimate of fair value.

#### **DHX MEDIA LTD**

DHX Media Ltd. is a Halifax-based media company that produces, distributes, and licenses television and film programs primarily for children and families. DHX currently owns one of the world's largest independent libraries (12,000 half-hour episodes) of children's television content, containing popular brands such as Teletubbies, Caillou, Johnny Test, Inspector Gadget, Strawberry Shortcake and Yo Gabba Gabba, among others. DHX licenses and sells its content library to its global customer base which includes more than 200 multi-national broadcasters, merchandisers and distributors such as Netflix. The company is benefiting from strong demand for content as traditional distributors and new entrants compete for an audience. The shares have fallen since peaking in late 2014 at \$10.00 and reached a level below Galibier's view of intrinsic value.

#### **ENGHOUSE SYSTEMS**

Enghouse Systems (ESL) is an Ontario-based provider of enterprise software with two primary business segments: the Interactive Management Group and the Asset Management Group. The Interactive Management Group provides interaction tools for its call centre customers that is deployed on site, hosted, or delivered through a hybrid model. The Asset Management Group provides software to the transportation, telecommunications and utilities sectors. ESL's software tools are entrenched and benefit from high switching costs and recurring revenue. The company's key competitive advantage lies in its ability to source small acquisitions at attractive prices and allocate capital to enhance shareholder value. ESL's growth prospects remain strong and Galibier expects the company to continue to grow through acquisitions given the fragmented nature of its industry. The stock offers compelling value after selling off since the end of 2015.

#### **GLUSKIN SHEFF + ASSOCIATES**

Gluskin Sheff (GS) is a Canadian based wealth management firm focused on the high net worth (HNW) private client market with \$8.2bn in assets under management. GS generates revenues from base management fees and performance fees, which are earned when annual portfolio returns exceed pre-set hurdle rates (between 0-15%). Its unique product offering for the HNW market coupled with its high-end brand and industry leading margins offer a compelling investment opportunity. Its share price has recently been under pressure as the company deals with ongoing issues with the founding partners and succession.

#### **STARBUCKS**

The future looks bright for the world's largest retailer of coffee and related products. The company continues to buttress its network of 12,400 company owned stores and 11,000 franchised units. China, in particular, offers a long runway for growth at Starbucks. The rapid and significant adoption of the Starbucks App has led to the company having quite a sizeable float of prepaid product and this, coupled with the new Mobile Order and Pay technology, has significantly increased the value proposition to the customer. An emerging opportunity for the company is found in its consumer packaging offering of coffee in bag and K cup formats. All in all, Galibier sees strong and predictable earnings growth over the medium- to long-term.

The names that were exited during the first half of the year were Apple, AutoCanada, Booz Allen Hamilton, Cummins Inc., Evertz Technologies, Genworth MI Canada, Goldcorp, Paramount Resources, Ross Stores, Thermo Fisher Scientific, Transforce and Verizon Communications.

As of June 30, 2016 the fund contained 23 names in Canada and 20 names in the U.S. As always the fund is concentrated in high conviction ideas that offer diversification across business sectors and market capitalization ranges. All of the 43 companies in the fund demonstrate Galibier's five key criteria: an enduring competitive advantage, the potential for high free cash flow, strong management teams, above average growth and an appropriate level of financial leverage.

Given the fundamental, bottom-up investment decision making process at Galibier, sector / industry weightings are a by-product of the investment process. Investments are made purely on the basis of maximizing the potential for investment return. However, because Galibier seeks to only hold companies with enduring competitive advantages, it generally finds few such names in price taking industries such as commodities. The industry group breakdown of the fund as of June 30, 2016 can be found below:

**Industry Split (June 30/2016)**

For the first half of the year in Canada, the best performing sectors were Materials, Energy and Utilities while the weakest performing were Health Care, Information Technology and Consumer Discretionary. In the U.S., the market was led higher by the Telecom, Utilities and Energy sectors, offset by the weakest performing sectors of Financials and Information Technology.

Although mindful of the index, Galibier is not constrained by it. Galibier is a benchmark agnostic investment manager and defines risk as a permanent loss of capital and/or underperforming an acceptable rate of return -- not underperformance relative to an index. While Galibier is mindful of the index, it does not drive the decision making process.

During H1 2016, the top five stocks that contributed to the fund's performance were Cargojet, Ag Growth International, Northland Power, MTY Food Group and Bank of Nova Scotia.

**CARGOJET**

Cargojet was a solid contributor to performance following the announcement of its cargo agreement with Air Canada. The relationship has started with three flights a week to Latin America and is expected to expand to European service later this year. Galibier is also optimistic about Cargojet's new relationship with Amazon that has recently been disclosed, which offers significant growth opportunity as well. In addition to operating its core business with increasing efficiency, Galibier is excited about the increasing charter business and potential growth in the Air Canada relationship.

**AG GROWTH INTERNATIONAL**

Ag Growth was a strong performer as sentiment started to improve and all signs are pointing towards a strong crop for 2016. The shares were driven down early in the year by their removal from the Dow Jones Canadian Dividend Index which generated a net sell of 1.3 million shares. Part of the long term thesis for Ag Growth is the potential for international expansion in Brazil and Galibier was pleased to see the announcement of their acquisition of Extringer, made late in Q1. This acquisition marks a significant step forward for their growth in Latin America. Galibier continues to believe management will be able to surface value from the integration of Westeel's product portfolio, bolt on additional products similar to their recent fertilizer acquisitions and grow the business internationally.

**NORTHLAND POWER**

Northland Power had strong returns after announcing it had achieved first power on its Gemini offshore wind project in the North Sea. While this is the largest project it has ever taken on, Northland continues to execute well, with construction continuing on time and on budget. It is also making good progress on the construction of its second large offshore project, Nordsee One. Galibier is excited by the upcoming completion and full contribution of these projects, as well as how Northland will use this newly developed expertise to add future value for shareholders.

**MTY FOOD GROUP**

MTY had strong performance following its announcement of the acquisition of U.S. based Kahala Brands. Galibier had long believed that management would make a sizeable acquisition which would allow significant leverage of the administrative network within MTY, as well as allow for geographic expansion of existing brands. The acquisition of Kahala almost doubles the size of the company and is significantly accretive as MTY could use their balance sheet to finance the deal. Galibier was impressed with management's ability to execute on their strategy, leveraging their balance sheet to add value for MTY shareholders.

**BANK OF NOVA SCOTIA**

Bank of Nova Scotia (BNS) shares rebounded during the first half of the year. As the price of oil declined in 2015, BNS shares sold off due to investor concerns about the energy exposure in its loan book. The stock price has since recovered as the price of oil stabilized and investor fears abated. Under the direction of CEO, Brian Porter, there have been several management changes at the company that have been viewed positively by investors. In addition, the bank continues to invest in 'fin-tech' initiatives which should lead to improving margins in the future. Galibier continues to believe BNS shares offer a reasonable valuation at current prices.

The top five stocks that detracted from the fund's performance during H1 2016 were Martinrea, AIG, Alphabet, Gilead and Biogen.

#### **MARTINREA**

Investor concerns regarding slowing global auto sales pressured shares of Martinrea (MRE) this quarter which now trades at a modest earnings multiple of 5.1x. Management continues to focus on winning new programs, executing on ramping up recently won business and increasing utilization rates of its global manufacturing network. All of which should increase profit margins toward their goal of 6%. The resulting cash generation from higher profits will allow management to reach their second goal of reducing debt to 1.5x EBITDA by year end 2017. All of this highlights that there are many 'self help' aspects to the MRE investment thesis, independent of gyrations in the global auto production cycle. As one of the few remaining class 1 suppliers to the auto OEMs, MRE is well positioned to increase revenue and is a key beneficiary of the trend towards lighter, more fuel efficient cars.

#### **AIG**

Like many interest rate sensitive stocks, AIG rallied as markets began anticipating the impact on earnings due to higher interest rates. However, these rising interest rate expectations became much more muted as the U.S. Fed and the Bank of Canada became quite a bit more "dovish" from a monetary policy perspective. These rate increases now appear to be on hold or at least delayed. As well, AIG's Management has succumbed to activists calls for board representation but appears to be dragging its feet on the breakup of the company. Galibier continues to see significant value in AIG on a going concern as well as "sum of the parts" basis.

#### **ALPHABET**

After increasing significantly in 2015, shares of Alphabet were down slightly in the first half of 2016. Investor concerns around the potential impact of a slowing global economy on advertising spending (Alphabet's prime source of profits) during the first quarter coupled with the potential impact of the UK exiting the European Union on Alphabet's business in the second quarter lead to a weakening in the share price. Despite the unresolved concerns, Alphabet offers compelling value and significant upside as it continues to grow profits and improve capital allocation to enhance shareholder value.

#### **GILEAD**

Gilead has been impacted by the selloff due to US election rhetoric, despite strong double digit growth in sales and earnings. However, Merck, a Gilead competitor, launched a new product that intends to compete with Gilead's current Hepatitis C Vaccine. This raised concerns of price competition and market share erosion. While there would be some impact to Gilead's #1 market share, studies have indicated that Merck's product has numerous label restrictions that make it inferior to Gilead's in terms of ease of use. The impact of Merck's new product will be limited to future new patients diagnosed with Hepatitis C. Galibier believes that Gilead has the wherewithal to withstand this competition due to its strong balance sheet and the relative difficulty of switching current patients into new products.

#### **BIOGEN**

Biogen actually had a solid showing in terms of earnings and revenues for the last quarter. Unfortunately, the company suffered a setback in one of its major pipeline products, a multiple sclerosis (MS) drug that seeks to restore nerve communication amongst MS patients. It is more likely that the company will have to re-do the phase two testing of this pipeline drug due to the mixed results obtained. Nonetheless, at current valuations, Galibier believes that the market is not appropriately imputing the value of future R&D discoveries in the company's share price. Any positive news on its numerous pipeline prospects, a receding of Hillary Clinton's rhetoric on drug prices or smart corporate action should aid the stock's price appreciation.

### ***Recent Developments***

Galibier Capital is a bottom up, stock picking investment firm and its competitive advantage is in proactively valuing individual businesses. Given this attention to valuation, Galibier focuses on economic factors at the firm or industry level. As such, although cognizant of macroeconomic conditions, it is chiefly microeconomics factors that drive investment strategy at the firm.

Galibier's investment process seeks to identify companies with enduring competitive advantages and solid long-term growth rates. Due to this fact, Galibier maintains minimal exposure to cyclical, resource industries such as Energy and Materials. After a weak 2015, resources stocks were strong to start 2016. As prices increased during the year, Galibier reduced its exposure to energy and eliminated its one gold position.

Due to its disciplined investment process, Galibier is willing to have short-term fluctuations in performance such as when resource names are strong, as long as there is the potential for good long-term absolute returns. With a concentrated portfolio, Galibier expects volatility versus the benchmark and is willing to sustain this short-term pain against its long-term objectives.

As Galibier sold down its resource exposure, it used the proceeds to invest in high quality, non-resource names at attractive prices in industries such as financial technology, media, software, pharma and retailing. Galibier's focus is on the long term and its process allows it to see through excessive discouragement or optimism.

The volatility experienced during the first of 2016 is not expected to subside as investor sentiment will continue to be impacted by the UK's exit from the EU, social unrest in the Middle East and future changes to interest rates as Central Banks combat sluggish economic growth.

Given all of these developments, it has never been more important to have a proactive view of valuation and to be ready to act. In difficult times like these, it is important to remember that volatility may provide opportunities for extraordinary returns for long-term investors. Prices change each day. Value does not.

#### ***Change of Securities Offerings***

Effective June 15, 2016, the securities of the Ultra High Net Worth series is no longer available for purchase, except by investors who own securities of such series as at June 15, 2016, who are permitted to switch their securities of this series from one NexGen Fund or Natixis Fund for securities of the same series of another NexGen Fund or Natixis Fund.

### ***Related Party Transactions***

NGAM Canada LP (the "Manager") provides investment management, distribution and administrative services to the Fund. These services are provided in the normal course of operations and are recorded at the amount of consideration agreed to by the Manager and the Fund. National Instrument 81-107 requires the Fund, to establish an independent review committee ("IRC") to whom the Fund must refer all conflict of interest matters for review or approval. NI 81-107 also imposes obligations upon the Manager to establish written policies and procedures for dealing with conflict of interest matters, maintain records in respect of these matters, and provide assistance to the IRC in carrying out its functions.

*Management Fees*

NGAM Canada LP is the manager of the Fund. In consideration for the investment advisory services provided, the Manager receives a monthly management fee based on the daily average net assets of each series of the Fund, other than the Institutional series. From its management fees, the Manager pays the cost of portfolio manager compensation, and sales and trailing commissions to dealers who distribute securities of the Fund. In consideration for other administrative services provided, the Manager may also charge an administrative fee to the Funds.

From time to time, the Manager may reduce the effective management fee payable by some unitholders by reducing the management fee it charges to the Fund, directing the Fund to make management fee distributions to these unitholders, or by rebating these fees back to the Fund in amounts equal to the management fee reduction. Management fee distributions are automatically reinvested in additional units of the Fund and are accounted for as distributions for financial statement purposes.

*Fund Operating Expenses*

Each Fund is responsible for the payment of all operating expenses including, but not limited to, taxes, accounting fees, legal fees, audit fees, trustee fees, IRC fees, custodial fees, administrative costs, investor servicing costs, broker commissions, interest and bank charges, and costs of reports and prospectuses. In consideration for other administrative services provided, the Manager may also charge an administrative fee to the Funds. The Manager allocates to the Fund certain overhead costs which are directly related to the operation of the Fund (excluding marketing and sales). Those overhead costs would include a portion of the Manager's IT computer software, systems and staff salaries, facilities, insurance (property and liability only), depreciation on fixed assets, data and telephone, printing, office and other general administrative costs.

Operating expenses are attributed to a Fund, or a Fund's series. Common operating expenses of the Funds may be allocated among each fund based on the average number of securityholders or the average daily net asset value of that fund, or other methods of allocation that the Manager deems appropriate, depending on the type of operating expenses being allocated.

*Expenses Absorbed*

The Manager may waive or absorb a portion of the management fees or operating expenses for certain funds. The decision to absorb these expenses is reviewed periodically and determined at the discretion of the Manager, without notice to unitholders.

The related party fees charged are as follows:

	June 30, 2016	June 30, 2015
Management fees	12,003	13,812
Administrative services provided by the Manager	3,551	3,961
Fund expenses absorbed by the Manager	(20,765)	(18,436)

**Other Information**

***Change of Control of the Manager***

In August 2015, the name of the parent company of the Manager changed to Natixis Global Asset Management Canada Corp from NexGen Financial Corporation.

***Notional Distributions***

The Fund's annual distribution may be paid in the form of a notional distribution. A notional distribution occurs when a fund declares a distribution in additional units and then completes a concurrent unit consolidation such that the number of units outstanding after the consolidation is identical to the number of units held before the distribution was paid. The net asset value per unit is not affected by the notional distribution.

**Management Fees and Series Description**

The Fund currently offers eight series of units: Regular, Regular F, High Net Worth, High Net Worth F, Ultra High Net Worth, Institutional, Deferred Load and Low Load Series. (After June 15, 2016, the Ultra High Net Worth series is no longer available for purchase, except upon a reinvestment of a distribution or a switch from Ultra High Net Worth Series of another Fund)

Management fees differ among the Fund's series of units. The Fund pays the Manager an aggregate management fee. Management fees for the Institutional Series units are negotiated and paid directly by the investor, not by the Fund. From its management fees, the Manager pays the costs of portfolio manager compensation, and sales and trailing commissions to dealers who distribute securities of the Fund.

**As a Percentage of Management Fees**

Series	Management Fee (%)	Dealer Compensation (%)	General Administration, Investment Advice and Profit
			(%)
Regular, Deferred and Low Load	2.00	29	71
Regular F	1.00	0	100
High Net Worth	1.75	54	46
High Net Worth F	0.75	0	100
Ultra High Net Worth	1.50	0	100

## Past Performance

The past performance shows historical performance of each series of units of the Fund. This information is provided to show the past performance only and does not necessarily indicate how the Fund will perform in the future. The past performance information assumes that all distributions were reinvested in additional units of the same series of the Fund. The past performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance.

## Year-by-Year Returns

The following chart illustrates the annual performance of each series of units of the Fund since its retail inception date – June 9, 2014. The charts show, in percentage terms, how much an investment made on the first day of each financial period would have increased or decreased by the last day of each financial period.

## Financial Highlights

\* Financial highlight information is derived from financial statements prepared in compliance with International Financial Reporting Standards ("IFRS"). As at June 30, 2016 there was no significant difference between "Net Assets" and "Net Asset Value" under IFRS.

### Net Assets Per Unit footnotes

- <sup>1</sup> This information is derived from the Fund's audited annual financial statements as at December 31 of the years shown and the interim statements as at June 30, 2016.
- <sup>2</sup> Net assets and distributions are based on the actual amount of units at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the financial period.
- <sup>3</sup> Distributions were reinvested in additional units of the Fund, unless the investor requested payment in cash.
- \* This is not a reconciliation of the beginning and ending net assets per unit as the increase (decrease) from operations data is based on the weighted average number of units during the period rather than actual unit amounts at the relevant time.

### Ratios and Supplemental Data footnotes

- <sup>1</sup> The information is provided as at June 30, 2016 and December 31 of the years shown.
- <sup>2</sup> The management expense ratio (MER) is calculated in accordance with National Instrument 81-106 and is based on total expenses (excluding distributions, commissions, portfolio transaction costs and forward fees as applicable) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. In a period where a series is established, the management fee ratio is annualized from the date of inception to the end of the period.  
  
The Manager may authorize a reduction in the management fees and/or operating expense rates generally for certain investors of the Fund who pay or incur distribution or other expenses normally paid by the Fund or the Manager. In this case, if the Manager reduces or rebates a portion of the management fee, the Fund or the Manager pays an amount equal to the reduction either as a distribution or as a direct rebate. The MER does not take this type of reduction into account.  
  
The Manager may temporarily reduce or absorb all or any portion of the management fee and/or operating expenses of the Fund and can terminate the reduction or absorption at any time. The Manager expects to continue to absorb these fees or expenses until such time as the Fund is of sufficient size to reasonably absorb all fees and expenses.
- <sup>3</sup> The Fund invests in shares and debt of the Tax Managed Fund and does not directly incur portfolio transaction costs. The trading expense ratio represents total commissions and other portfolio transaction costs of the underlying Tax Managed Fund expressed as an annualized percentage of the daily average Transactional NAV of the Tax Managed Fund during the period.
- <sup>4</sup> The Fund's portfolio turnover rate is represented by its proportionate share of that of the Tax Managed Fund. The Tax Managed Fund's portfolio turnover rate indicates how the portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Tax Managed Fund buying and selling all of the securities in its portfolio once in the course of the period. Typically, the higher a fund's portfolio turnover rate, the greater the trading costs payable by a fund. There is not necessarily a relationship between a high turnover rate and the performance of a fund.
